

Candidacy for Receiving Auditory Training with cLEAR™

1. The new hearing aid user:

- Acclimate faster to a new hearing aid
- Minimize likelihood of hearing aid returns

2. The experienced hearing aid user who is not satisfied with his or her current listening performance:

- Enhance conversational fluency
- Have access to an additional intervention
- Increase self-confidence and decrease perceptual effort

3. The patient who complains of listening in noise:

- Play games with adapting background noise
- Play games which allow noise level to be adjusted

4. The patient who is not yet ready to purchase hearing aids:

- Still receive hearing healthcare
- Take first step towards ultimately using a hearing aid

5. The patient who wants to engage more effectively in conversations with an FCP:

- Learn to recognize the speech of a loved one

6. The patient who expects to interact with a new communication partner:

- Learn to recognize the speech of someone new

7. The patient who has received a new cochlear implant:

- Acclimate to the cochlear implant more quickly
- Learn to interpret novel auditory stimuli

8. The patient who has experienced sudden hearing loss:

- Adjust to abrupt change in hearing status
- Gain a sense of control over a traumatic experience

9. The patient who is a poor lipreader:

- Learn to maximally use the auditory signal
