

cLEAR Ear Train Your Brain

Are conversations difficult to follow?

Do you have problems hearing in noisy environments?

Is hearing comprehension affecting your relationships?

Hearing aids alone can't always address the full impact of hearing loss – that's where auditory brain training comes in.

cLEAR's™ Auditory Brain Training Games may be the missing piece of your treatment program – and the key to regaining confidence in your hearing abilities.

- cLEAR Auditory Brain Training Games are easy and fun to use
- Games can be played right at home via our website

- Your hearing healthcare provider will be following your training and providing active coaching
- You can even train using the voice of a family member or friend

Created using a decade of research, cLEAR Auditory Training has proven to be effective. cLEAR:

- Increases active participation in social situations
- Reduces stress levels during conversations
- Improves confidence in noisy environments

How do you play cLEAR Auditory Brain Training Games?

- Play on any computer or iPad that has speakers and access to the Internet
- Please follow your customized lesson plan prescribed by your hearing healthcare provider
- Your provider will be following your progress and giving you key coaching as you progress
- Each of the six games work on specific language and listening skills. Some in quiet and some in noise
- Choose the type of voice you want to train with (male, female, child), and even train with the voice of a family member or friend

You should consider cLEAR if:

- **You have new hearing aids:** cLEAR complements the benefits you receive from using new hearing aids and helps you reach your listening goals faster than without active training
- **You're not ready for hearing aids:** cLEAR can provide the first step in your hearing treatment plan
- **You already use hearing aids, but still feel you are missing out in conversations:** Often, people have great hearing aids but still need an organized way to learn new listening skills

Hearing loss is unique to each person - its treatment should be too. Talk to your hearing healthcare provider today about making the cLEAR choice.
